

# Careers Update

## September 2018

### STEM Day

#### Science, Technology, Engineering and Maths

In June we had *Forensic Minds* into school to carry out a CSI investigation day. This included looking at different types of fingerprints, lifting fingerprints from a crime scene, working out and solving the 'Dastardly Crime'. From all the feed back we received from the students and staff that took part they all had an informative and fun time. Dane Ivory who ran the course, emailed me to say;

*"Your students are amazing and I was super impressed with the way they handled the day. I was aware how very much out of their comfort zones they will have been. They behave so well and were a real credit to you and the other staff members."*

### Colleges Visits

This term we have had visits from:

- \* Newcastle College
- \* Tyne Met College
- \* Gateshead College
- \* Kirkley Hall (Northumberland College)

They each have been talking to our KS4 & 5 students about the courses they offer and how students can access the courses.

### Independent Career Advisor

Anne Clarke has spent time with all our KS4 & 5 students talking to them about their futures and has spent time 'Getting to Know' our KS3 learners. This will support us all in planning for their futures.

We are looking forward to many more exciting and informative sessions for all our students from September onwards.
